

SymetriQ Cloud Billing Engine

*“Public Cloud Spend
to Reach \$29.5 Billion
by 2014”*

– IDC

SymetriQ's Billing Engine has been designed to meet the needs of Cloud Computing providers. Developed initially for use on the **SymetriQ** Public Cloud, the Billing Engine is now available for license to Cloud Computing Providers. The solution is currently in use on the **SymetriQ** Public Cloud, handling thousands of customer transactions per hour.

symetriQ

Benefits

- **Works With Multiple Cloud API's**

Designed from the ground up to work with virtually any Cloud Provider's Application Programming Interface (API).

- **Multi-Tenancy**

Multi-tenant capable, enabling you to keep track of spending at a departmental level and allowing a multi-tier reseller model.

- **Granular Reporting**

View customer usage on an hourly basis at a machine level. Detailed reporting is available which can be easily exported.

- **Multi-Currency Ready**

Designed to work with multiple currencies. Exchange rates can be calculated in real time, or based on a set rate.

Support and Delivery

- **Support**

Supported 24/7 by our dedicated team of engineers.

- **Delivery**

Delivered from the SymetriQ Cloud, ensuring scalability and availability.

Pricing

Our pricing model is simple and cost effective. Unlike competitors, we do not charge excessive upfront fees for implementation. We also charge 50% less than the market average in ongoing fees.

- **Our Pricing Model:**

- £1000 implementation fee
- 1% of revenue processed
