

SymetriQ Cloud Virtual Desktops (VDI)

*“There is
unprecedented
interest in desktop
virtualization to
improve IT efficiency
and security”*

– 451 Group

SymetriQ Cloud Hosted Virtual Desktop Infrastructure (VDI) reduces operating costs and brings efficiencies in supporting end user desktop environments, without any upfront investment. **SymetriQ** offer a number of cost-effective Cloud Hosted VDI solutions, which bring real cost savings with no long term commitment.

symetriQ

Features

- SymetriQ Cloud Hosted VDI allows instant deployment of a persistent desktop session
- Integrate easily with backend infrastructure on site or in SymetriQ Public Cloud (reducing latency)
- Secure UK datacentre (N3, ISO27001, ISO9001, SAS70)
- Custom access to applications via user groups
- 50% cost saving over traditional desktop deployment

Technology

- Secure Linux based VDI technology
- Microsoft offering also available
- Runs on SymetriQ's secure, UK based Public Cloud
- Access from anywhere via secure connection
- 50GB of fast local storage free with each VDI session

Benefits

- No upfront cost
- Reduction of ongoing cost
- Reduction of support requirements
- Work from anywhere
- Keep valuable data secure
- Pay only for what you use
- Instant deployment
- Deploy almost any desktop application

Pricing
