Why SharePoint

Work better together

Connect with your colleagues in new and creative ways. Easily find and work with people who have the right skills, expertise, and shared interests.

Work faster

Quickly become more productive. SharePoint 2010 works seamlessly with technologies you currently

use, including Microsoft Office, Microsoft Exchange Server, and Microsoft Unified Communications.

Work smarter

Make better business decisions. Easily find the right business information – regardless of who created it, what format it is, or where it lives.

SharePoint capabilities

Sites

Single infrastructure for all your business websites. Share documents, manage projects with partners, publish information.

Composites

Tools and components for creating do-it-yourself business solutions. Build no-code solutions to respond to business needs.

Insights

Gives everybody access to the information in databases, reports, and business applications. Helps people locate the information they need to make sound business decisions.

Communities

Great collaboration tools within a single platform to manage them.

Content

Makes content management easy. Set up compliance measures 'behind the scenes' like document types, retention policies and automatic content sorting.

Search

Cuts through the clutter. A unique combination of relevance, refinement, and social cues helps people find the information and contacts they need to get their job done.
